Gencod 3660215107016

Technical characteristics

- ▶ Power supplied by the Thombox
- ▶ Internal Li-ion 7.4V 3500mAh battery
- ▶ Supplies power to your Thombox for 24 hours if there is a power cut.
- ▶ Battery charging and system on indicator lights
- ▶ 3G USB drive included for data-type SIM card (not included) to provide a continuous Internet connection by switching to the mobile telephone network.
- ▶ For indoor use only

Features

- ▶ A vital component of fail-safe security, with the included battery, this bundle will ensure that your system remains up and running for 12 hours in the event of a power cut and will ensure that you are kept up to date and in control of your system in the absence of broadband or in the event of network outages. With a 3G plan of your choice, you can also enjoy full use of your **Thombox** in e.g. a second home that is not connected to the regular telephone network.
