Ref. 510704

Gencod 3660215107047

Technical characteristics

- ▶ 1 infra-red wireless motion detector
- ▶ Angle of detection : 100°
- ▶ Detection range : 12m
- ▶ Protection against water from any direction (IP54)
- ▶ Operating temperature : -20°C to +50°C
- ▶ Operates with 2 LR6 AA batteries (not included)
- ▶ Battery life : up to 2 years with non-intensive use
- ▶ Radio frequency : 868.3MHz
- ▶ Open air range : 300m

Features

- ▶ Working via infrared detection, this high-performance sensor detects any movement of human beings outside your home, allowing you to secure your property (vehicles, garden furniture) and be given an early warning before any attempted break-in can even take place. It sends the information to your **Thombox**, which triggers the alarm. Able to distinguish between human beings and pets (cats, dogs, etc), thereby avoiding false alarms caused by pets of up to 25kg running past. This extremely easy-to-use detector has a range of 300m, with simple, wireless installation. You can also use it to trigger lighting in a passageway such as an outdoor stairway or patio and set a timer as required via your **Thombox**, thereby saving on your electricity.
