### Technical characteristics

- ▶ Optical sensor to detect smoke
- ▶ Built-in siren with a sound power level higher than 85 dBa at 3 metres
- ▶ Power supply : Lithium battery with a life of 10 years (with non-intensive use, battery cannot be replaced)
- ▶ Automatic battery monitoring and, in the case of a defect, a light and sound signal is emitted
- ▶ A grid to protect against insects prevents false alarms.
- ▶ Test button for functional checks
- ▶ Easy installation, mounting kit provided (plugs and screws)
- ▶ Dimensions : H69 mm x ø105 mm
- ▶ Operating temperature: 0° C to + 40° C

### Features

- ▶ In response to the large number of domestic fires that occur in France, this high-quality detector is made in France and NF approved. It will detect if any fire starts and sound its standalone 85dB alarm, allowing occupants to evacuate the premises. The alarm will also be sent to the **Thombox**, which will launch the scene of your choice (sending smartphone alerts, switching on lights, setting off alarm signals etc.). This model has the same specifications as the professional duty detectors required in public places. Its approval rating and 10-year battery life make it one of the best performing models on the market.
