

Gas detector

Safety

Ref. 510726

Gencod 3660215107269

Technical characteristics

- ▶ 1 gas detector. Must be connected to 230V mains.
- ▶ Built-in 94 dBa siren
- ▶ 1 radio transmitter. Operates with one CR123A lithium battery (included)
- ▶ Radio frequency : 868.3MHz
- ▶ Compatible with the following gases: methane (natural gas, mains gas), propane and butane (LPG)
- ▶ 2 different indicators and sirens depending on the quantity of gas detected
- ▶ Lifespan of the detector : 5 years, excluding the batteries, with non-intensive use
- ▶ Storage conditions : Temperature between -20°C and +50°C
- ▶ Humidity : less than 70%

Features

- ▶ Allows you to detect any abnormal buildup of city gas, propane, butane and LPG in the surrounding air. In the event of a leak, you are immediately warned with a 95dB siren as well as e-mail and mobile notifications to your smartphone and tablet. If you wish, your **Thombox** will trigger the alarm siren and/or scene of your choice, such as opening your shutters to allow occupants to escape more easily.
