*Safety*

*Connected Home*

*Ref. DSC - 523W*

Available on the iPhone **App Store**

**Google Play**

## Technical specifications

► The indoor camera is equipped with :

- 1 integrated microphone for audio acquisition
- 1 Wi-Fi antenna for wireless connection to the computer network
- 1 automatic image and luminosity correction system
- Infrared night vision : range 8m
- 1 slot for micro SDHC card, maximum size 16GB
- 2 motors enabling coverage of a wide surveillance area (300° horizontal field of view and 90° vertical field of view)
- Motion detection alert system
- 1 5Vdc 2A power supply inlet supplied
- Video resolution : 1280 x 720
- H.264 compression : providing quality images even with a less than perfect internet connection
- Slot for micro SDHC card for internal storage (not supplied)

## Features

► Simply plugs into an electricity socket and, with its built-in motion sensor, to warn you of any movement inside your home, allowing you to check things out in the event of any alarm. You can also monitor it whenever you wish, e.g. to check that your child has got back home safely from school. Can be used either with your Thombox within any scene of your choice, or also from the free smartphone and tablet application. With 720-line HD resolution, you will get a high quality image, and the two motors allow you to rotate as you wish to suit your needs.

## Compatibility

► The camera is fully autonomous, but can also be used:

- With a Thombox : full integration, option to change the direction of the camera and to activate it, to store and view images on a secure server following motion detection.
- The camera has a network video recorder from the Thomson Security range : can be used as a supplementary camera, enabling you to store video footage from the camera on the video recorder's hard drive, to programme video recordings at preset times and/or when motion is detected, etc. The motor control is also compatible with network video recorders from the Thomson Security range.
