Ref. 516102

Gencod 3660215161025

Technical characteristics

- ▶ 1 radio-controlled socket for on/off operation of electric heating
- ▶ Power supply : 230Vac 50Hz
- ▶ Max power of the operated device : 3200W (14A)
- ▶ Maximum power (peak) : 29A
- ▶ Radio frequency : 868.3MHz
- ▶ Open air range : 150m
- ▶ The socket is for indoor use only

Features

- ▶ This extremely easy-to-install plug can be plugged into any socket of your choice, allowing you to control any electrical appliance rated less than 3200W (heater, lamp, home cinema appliances, etc) either locally and/or remotely via the plug's remote control. It can also be included in your **Thombox** scenes (time scheduling, thermostat control, etc.). Programme your electric radiators to come on or off depending on whether you are at home, for improved comfort and a considerable saving on your electricity bills. With its energy meter feature, you will also be able to monitor the actual power consumption of your appliances and take better control of how much electricity you use.
