Réf. 516106

Gencod 3660215161063

Technical characteristics

- ▶ 1 6-command pilot wire electric heating radio receiver
- ▶ Surface-mount installation
- ▶ Power supply : 230Vac 50Hz
- ▶ Radio frequency : 868.3MHz
- ▶ Open air range : 150m

Features

- ▶ This radio module is wired between the power supply and an electric radiator (max power 3680W). The module allows you to turn the heating on and off using an optional remote control or your smartphone or tablet, but also to include it in your **Thombox** scenarios (time, temperature, etc.). Connected to a 6-command pilot wire, it allows you to take advantage of these features in your programmes (Off, On, Comfort, Frost Protection, Eco, Comfort-1, Comfort-2).
