Réf. 516110

Gencod 3660215161100

Technical characteristics

- ▶ 1 radio receiver for operating electric water heaters
- ▶ Power supply : 230Vac 50Hz
- ▶ Radio frequency : 868.3MHz
- ▶ Open air range : 150m

Features

- ▶ Remote control of your water-heater. It is simply connected to the day/night switch on your distribution board. Once it has been linked to your THOMbox, you can remotely control your water-heater via your smartphone or tablet and include it in your setups. For example, in a second home, you can turn your water-heater on a few hours before you arrive and so get lovely hot water as soon as you get there and make savings during prolonged absences.
